K. Z. Bell

Art Unit: 1661

**Detailed Action** 

### **Status of Application**

The substitute drawings filed July 9, 2003 have been entered.

### **Objection to the Disclosure**

### 37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

### 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:

Art Unit: 1661

int Omt. 1001

**Detailed Action** 

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

Page 3

In plant applications filed under 35 U.S.C 161, the requirements of 35 U.S.C. 112 are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 35 CFR 1.163(a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear, and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More Specifically:

A. Page 3, lines 16-22, Applicant has now provided a stem length but has deleted the stem internode length. Applicant should set forth in the specification the typical and observed stem internode length.

B. Page 5, line 1, Applicant had stated "Number of disc florets per capitulum" in the originally filed specification on page 4, line 6. It is not understood why applicant has changed the terminology originally set forth as this appears to be the botanically correct terminology to utilize.

Serial Number: 10/045,978

Art Unit: 1661

**Detailed Action** 

Applicant should insert --disc florets-- in place of "corolla". Further, as stated in the previous

Office action, mailed February 12, 2003, Applicant should set forth in the specification additional

Page 4

information relative to the instant plant's disc florets including the typical and observed disc

diameter, disc floret shape, length and diameter, and coloration with reference to the employed

color chart.

C. Page 5, lines 2-7, It is not understood if applicant is intending the "corolla" to mean --

disc florets--. If such is what applicant intends then "corolla" should be deleted and --disc florets-

- should be inserted as this appears to be the botanically correct term to use in these instances.

D. As stated in the previous Office action, mailed February 12, 2003, The instant plant's

inflorescence is a composite. Typically composites are made up of ray and disc florets. As such,

if produced, applicant should set forth in the specification information relative to the instant

plant's ray florets including the typical and observed ray floret number per bloom, shape, length,

diameter, and coloration (both surfaces) with reference to the employed color chart.

E. Page 5, lines 21-24, As stated in the previous Office action, mailed February 12, 2003,

Applicant sets forth information relative to the instant plant's stigma and style. However,

applicant has not described any reproductive organ and has not stated where the Androecium and

**Detailed Action** 

Gynoecium are present, i.e. Typically, Androecium is present on both ray and disc florets and

Gynoecium is present on ray florets only.

Applicant should provide additional information relative to the instant plant's reproductive

organs including pistil number, anthers, stigma, styles, ovary/ies, (such as quantity, size and

coloration of organs) into the specification with reference to the color chart employed (if

available).

F. As stated in the previous Office action, mailed February 12, 2003, Applicant should set

forth in the specification information relative to the instant plant's inflorescence bud including the

typical and observed bud shape, length, diameter, and coloration with reference to the employed

color chart.

The above listing may not be complete. Applicant should carefully review the disclosure

and import into same any corrected or additional information which would aid in botanically

identifying and/or distinguishing the cultivar for which United States Plant Patent protection is

sought.

Art Unit: 1661

**Detailed Action** 

### **Claim Rejection**

## 35 U.S.C. 112, 1st & 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Objection to the Disclosure Section above.

### **Comments**

Applicant should note the new amendment format which is now mandatory (Web site stated below).

http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/revamdtprac.htm

#### Final

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Serial Number: 10/045,978

Art Unit: 1661

**Detailed Action** 

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the date of this final

action.

**Future Correspondence** 

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Kent L. Bell whose telephone number is (703) 306-3224. The Examiner can normally be reached Monday through Thursday from 6:00 am to 4:30 pm.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Bruce Campell, can be reached at (703) 308-4205.

The fax phone number for the group is (703) 305-3014 or 308-4242.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
